Objective

Aspiring Software Developer with a strong foundation in Java, React, and Data Structures Algorithms. Passionate about building efficient, scalable applications and solving complex problems. Actively developing projects involving APIs, web technologies. Seeking opportunities to apply and enhance my skills in a dynamic environment.

Education

- **Sri vasavi engineering college, Tadepalligudem** Currently pursuing
B-Tech
9.17 CGPA - till date
- **Aditya junior college** 2020-22
Intermediate
97.1%
- **Sunshine School** 2019-20
SSC
97.5%

Skills

- Languages : Basics of C, C++, Python, Java
- Web Technologies: HTML, CSS, Javascript, React
- Data structures, Machine Learning
- Database Systems : SQL
- Data Analysis Libraries : Numpy, Pandas, Matplotlib, Sklearn
- Other Tools & Technologies: Git & Github, VS code

Projects

- **Phishing website detection project**
Using machine learning and web development to detect websites whether they are legitimate or Phishing.
- **Amazon Clone**
Implemented product listings, user authentication, and a shopping cart
- **Expense Tracker**
This is a Python-based desktop expense tracker built with Tkinter for the GUI. It stores expenses in a local SQLite database and supports data visualization with Matplotlib. The app can export data to CSV file.

Certifications

- Microsoft Azure AI fundamentals(AI-900)
- Full Stack Web Development (Udemy)
- Fundamentals of Java Programming (coursera)
- Cloud computing (NPTEL ELITE)

Interests

- Frontend Development
- AI & Machine Learning in Web Development

Languages

- English
- Telugu
